AOOS Launches Two New Water Level Projects

AOOS is working with two organizations this spring to test the use of land-based GPS techniques for measuring offshore water levels as part of an effort to increase water level observations in remote areas of western and northern Alaska. [Learn more.](#)

AOOS 2016 Annual Impact Report

AOOS published its first Annual Impact Report for 2016. The report highlights accomplishments for the year. Take a look [here.](#)

AOOS Spring Board Meeting in Juneau

The AOOS Board met in Juneau on March 20 beginning with a morning business session at the offices of Board Chair Ed Fogels, Deputy Commissioner of the Alaska Department of Natural Resources, followed by an informal lunch with Alaska Lt. Governor Byron Mallott. The afternoon session was held at the US Coast Guard conference room and included discussions with the District

summary of the meeting [here](#).

Community Centered Regional Science Conferences

ALEUTIAN LIFE
FORUM

AOOS supports and participates in several science conferences each year, many of which are Alaska-based and community centered. The March 2017 Alaska Marine Policy Forum (AMPF) teleconference featured a discussion of community based regional science conferences and their value to Alaskans who find it difficult to network with colleagues because of the large travel distances between communities in Alaska. If you would like to participate in these calls please contact Holly Kent at Kent@aoos.org to be added to the list serve. [Find summaries of all AMPF teleconferences.](#)
